## PROJECTS

### Groove Guide | Full Stack Bootcamp — *designer/developer*

March 2024

- Create a responsive and functional website using server-side APIs.
- The group met acceptance criteria, using two separate APIs tokened from Spotify to generate artist suggestions with the user's input of genre choice and chosen range of monthly listeners.

### Code Quiz | Full Stack Bootcamp — *designer/developer*

February 2024

- Design and code a multiple-choice quiz.
- Solely designed a multiple choice quiz using js, storing local storage.

### Weather Dashboard | Full Stack Bootcamp — *developer*

March 2024

- Develop a weather dashboard displaying a five-day forecast.
- Discovered how to request data from a weather website's API to display weather data based on the user's location choice. Requested array data to append to a results card.
